

# Environmental, Health and Safety

Jacobs

## Driving sustainability, safety and compliance through innovation

At Jacobs, we help you navigate the quandary of global compliance and risk requirements by creating solutions that meet your objectives. Simply collecting and reporting past performance data is no longer enough – systems must be integrated and aligned to how your business operates and provide forward-looking insights.

We apply our EHS, sustainability, and multidisciplinary engineering expertise with leading technology partnerships and platforms to create solutions in the context of your teams' day-to-day activities. We focus on user adoption and automation, driving context and ownership throughout the organization to achieve your outcomes - and get it right the first time.
